

## **#OETC21 Conference Theme:**

### **Unprecedented Times, Unprecedented Education**

From current trends to emerging technologies, BYOD and blended learning to artificial intelligence and virtual reality, the Ohio Educational Technology Conference has spent the last 23 years informing Ohio's educators of the ever-changing world of educational technology. But now, in these unprecedented times, as the world has been grappling with a pandemic that has swept in and forced change to every aspect of life, it is more important than ever to look at how education can adapt and prosper, whether in the classroom or in the home. Unprecedented Times, Unprecedented Education is about what educators do best: rise to the challenges laid before them and deliver.
